

**Northwest Scientific Association 2019
Student Research Grant Competition**

The Northwest Scientific Association awards grants of up to \$1,500 to support student research in the pure and applied sciences. This is an opportunity to fund your research, organize a grant proposal, add substance to your CV, and potentially have your research published in the scientific quarterly, Northwest Science. Graduate and undergraduate students are encouraged to apply. The NWSA will award research grants up to \$750 for winning undergraduate [BA/BS] proposals, and up to \$1500 for winning graduate [MA/MS or PhD] proposals. Applicants must be either student or regular members of the NWSA for the year 2019 at the time of application. Visit the NWSA web page at www.northwestscience.org for membership information.

Grant monies may only be used to support research travel, materials, and supplies for student research (proposals requesting salary support or monies for travel to meetings will not be considered). Funding will only be offered for projects conducted in northwestern North America. All applications must follow the proposal submission guidelines provided on the NWSA website: www.northwestscience.org. The deadline for all grant proposals is midnight, February 17, 2019. All proposals must be submitted electronically to the chair of the Student Research Grant Committee. E-mail proposals by February 17, 2019 to: Regina M. Rochefort NWSA Student Grant Committee CHAIR e-mail address: nwsagrantsteam@gmail.com
